

Bharatiya
Krishak Samaj

AN INVITATION · DURGA PUJA 2026

Pravasi Krishi Bandhu

প্রবাসী কৃষি বন্ধু

You know the name of your village. Somewhere in it, a young woman or a young man is about to build a farm. This is an invitation to stand behind them — for one season, with the logs open the whole way.

₹1 Lakh — that is ₹1,00,000 (approximately US\$1,000)

Paid as five monthly instalments of ₹20,000

The whole of it, briefly

If you read nothing else, read this page. Everything after it is evidence for what is written here.

WHAT IT IS	The Krishi Ratna League is a championship for farms, run in the format that made cricket unmissable. Across West Bengal's 294 assembly constituencies , 5,000 young women and men will each build a Smart Integrated Farm — and be mentored, verified and graded through one full season, Durga Puja 2026 to Durga Puja 2027.
WHY	To make farming aspirational . A subsidy makes a farmer solvent for a year; a championship makes a nineteen-year-old in Bankura aspire to be a farmer , and gives rural Bengal something to aim at.
YOUR PART	You stand behind one of them — one named young person, in the bheete (ভিটে) your own family came from. You will be shown three applicants and you pick who you back.
THE AMOUNT	₹1 Lakh — ₹1,00,000 for the season, paid as five monthly instalments of ₹20,000 . ₹90,000 goes to the farm . Six per cent becomes prize money; administration and everything around it is four per cent.
WHAT YOU SEE	A named farm and farmer. Open logs — activity, photographs, expense ledger. A progress report against every instalment. The farmer's own video messages. And an invitation to the Season 1 awards, held before Durga Puja 2027.
WHO STANDS BEHIND IT	Bharatiya Krishak Samaj , founded 3 April 1955 by Dr Panjabrao S. Deshmukh , Union Minister for Agriculture from 1952 — seven decades for the Indian farmer. National President Shri Krishan Bir Chaudhary sits on the Government of India's Minimum Support Price Committee . The West Bengal chapter is led by MahAcharya Shri Sourabh J. Sarkar , Founder of KarmYog for the 21 st Century.
THE PRIZES	₹3 crore in all — ₹1 crore for the best farm, ₹1 crore for the best regional team, ₹1 crore across other categories. Farms are graded on Satya, Mangal, Sundar, Samriddhi .
THE NEXT STEP	Raise your hand . Nothing is asked of you now except your interest and your bheete — no payment, no commitment. A twenty-minute call follows.

₹10 crore

TO BE RAISED BEFORE DURGA PUJA 2026
— ONE THOUSAND FARMS

5,000

SMART INTEGRATED FARMS
ACROSS BENGAL IN SEASON 1

Sthapana · BangaManthan · RashtraManthan

Everything in this document sits inside three phases. Each milestone is a Durga Puja, because a Puja cannot be postponed for a delayed approval or a slow quarter.

YEAR ONE · 2026

Sthapana

স্থাপনা

Establishment. The League launches at Durga Puja 2026 on a working model farm. Applications open across all 294 constituencies, and the first 5,000 Smart Integrated Farms begin.

YEAR TWO · 2027

BangaManthan

বঙ্গমহন

Scaling across Bengal. Season 1 is graded and awarded before Durga Puja 2027. The model proven in one season is carried into every district of Bengal.

YEAR THREE · 2028

RashtraManthan

রাষ্ট্রমহন

Scaling across India. The Bengal Model established nationally by Durga Puja 2028 — the point at which Bengal has something the rest of the country copies.

The dates inside it

14 September 2026

STHAPANA

The Krishi Ratna League is launched by the **Hon'ble Minister of Agriculture, Government of West Bengal, Shri Dudh Kumar Mondal**, with the **Hon'ble Minister of State for Agriculture & Horticulture, Shri Amaya Kisku**. Applications open.

10 October 2026

MAHALAYA

The model farm at **Munshi Bheri**, in the East Kolkata Wetlands, is complete. Six weeks earlier it was a dump yard.

From 16 October 2026

DURGA PUJA

The Puja whose theme is Krishi Samaj — for the farmers. The pandal stands on the working farm. Season 1 begins.

2026 – 2027

SEASON 1

5,000 Smart Integrated Farms built, mentored, verified and graded across 294 constituencies. This is the season your farm runs in.

Before Durga Puja 2027

BANGAMANTHAN

Season 1 awards — ₹3 crore, the best farm, the best team. Held deliberately **before** the Puja, so that Pravasi Bandhus can attend the ceremony and then travel on to their own bheete for the Pujo.

Durga Puja 2028

RASHTRAMANTHAN

The **Bengal Model** established across India. **Bengal comes home.**

The Return

Most of us did not leave Bengal. We left a village, and Bengal happened to be around it.

There is a word for the place — **bheete (ভিটে)**. The plot the family held, the pond behind it, the name of the block you still give when an elder asks where you are really from. You may not have stood on it in **many decades**. You can still draw it.

What has happened to those places is not a mystery and it is not anybody's single fault. The young people left, as you left. The land stayed, and got smaller with each division. The ones who remained were told, in a hundred quiet ways, that farming was what you did when nothing else worked out. A boy who wanted to stay had no reason he could say out loud.

Agriculture in Bengal did not fail for want of soil, or rain, or hands. It failed for want of aspiration.

That is the specific thing this sets out to change, and it is why it takes the shape of a league rather than a scheme. A subsidy makes a farmer solvent for a year. **A championship makes farming aspirational** — something a young person in Bengal might actually want, with a team, a table, a season, and a name that gets read out.

We are not trying to rescue agriculture. We are trying to make a nineteen-year-old in Bankura **aspire to be a farmer**, to raise the aspirations of rural Bengal itself, and to build **aspirational farms** worth that ambition.

Pratyaavartan (প্রত্যাবর্তন) means homecoming. Not the aeroplane kind. It is the idea that a place can find its way back to the direction it had, and that the people who left it are not disqualified from helping — that in fact they may be the only ones with both the distance to see it clearly and the means to do something.

You are not being asked for charity. Charity flows down. This is closer to what an elder in the family used to do for a promising nephew — you back the young person, you stay interested, you ask how it went.

WHAT THIS IS NOT

This is not a donation to a general fund, and you are not buying a product. You are supporting one named agri-entrepreneur who is setting up a Smart Integrated Farm, and you will be able to see, month by month, exactly what happened on that piece of land.

Why this year and not another

Three things have come together in 2026 that have not been true at the same time before.

One — the governments are aligned

For the first time in **nearly five decades**, the government in West Bengal and the government at the Centre are working in the same direction. Whatever one thinks of any party — and Bharatiya Krishak Samaj takes no position on any — agricultural reform is one of the few fields where that alignment translates directly into what a farmer can actually reach: schemes that arrive, approvals that move, institutions that answer.

A window like this stays open for a few years, not forever. The work should be done inside it.

Two — agriculture never got its league

Cricket had the IPL. Music had Sa Re Ga Ma Pa. Dance had Dance India Dance. Each of them changed what an ordinary family thought was a respectable thing for a child to spend a decade on.

Agriculture — the one occupation that feeds the rest — has never had its equivalent. No table, no season, no tournament, no moment where the country watched. That absence is most of the reason a talented nineteen-year-old does not consider the land in front of him.

Three — the technology finally makes it honest

A programme like this was not practical ten years ago, because it could not be *watched*. A supporter in Bengaluru had no way to know whether a farm eight hundred kilometres away existed, or whether the money reached the soil.

That has changed. Farm activity can be logged with photographs and video, dated and located. Expenses can be recorded against activity and published to a ledger. AI can process the volume of evidence that five thousand farms will generate and flag what does not reconcile. This is the first year one could promise a supporter continuous sight of a farm and actually mean it — which is why the promise is made plainly in this document and not hedged.

THE DEADLINE IS NOT OURS

Durga Puja is a fixed date. It cannot be pushed for a delayed approval or a slow quarter. That is precisely why the whole three-year journey is pinned to it. A project without a non-negotiable milestone drifts. This one cannot.

On **3 April 1955**, **Dr Panjabrao S. Deshmukh** — Union Minister for Agriculture from 1952 — founded a farmers' body and deliberately kept it outside party politics, so that it could argue with any government of the day.

Seven decades later it is one of India's leading non-partisan farmers' organisations. It is not a political party and it is not a government scheme. It has spent that time in the unglamorous middle ground: on committees, in consultations, in the drafting of the rules that decide what a farmer is paid.

National President — Shri Krishan Bir Chaudhary

- ◆ **Member, Minimum Support Price Committee, Government of India** — the body that advises on the prices at which the country procures its food
- ◆ Former **Chairman, State Farms Corporation of India**
- ◆ Former **Chairman, Indian Sugarcane Development Council**, Government of India
- ◆ Founder of the **Small Farmers' Agribusiness Consortium (SFAC)**
- ◆ Former **Director, NAFED**

The National Advisory Board

The people who advise this organisation are the people who used to run Indian agriculture.

Dr R.S. Paroda	Former Director General, Indian Council of Agricultural Research (ICAR)
-----------------------	---

Siraj Hussain, IAS (Retd.)	Former Secretary, Ministry of Agriculture, Government of India
-----------------------------------	--

Ashish Bahuguna, IAS (Retd.)	Former Chairman, Food Safety and Standards Authority of India
-------------------------------------	---

Dr Baldev Singh Dhillon	Vice Chancellor (Retd.), Punjab Agricultural University
--------------------------------	---

Gopa Sabharwal	Vice Chancellor (Retd.), Nalanda University
-----------------------	---

THE WEST BENGAL CHAPTER

Established in **June 2026** at the direction of the National President, and led as State President by **MahAcharya Shri Sourabh J. Sarkar, Founder of KarmYog for the 21st Century**. **Mrs Rinku Majumder Ghosh** heads the Mahila Mandal. The Krishi Ratna League is the chapter's first major undertaking.

KarmYog for the 21st Century

DELIVERY

Bharatiya Krishak Samaj brings seven decades of standing with the Indian farmer. KarmYog brings the thing that is harder to buy: a record of actually changing how large numbers of people behave.

KarmYog was founded in 2008 by **MahAcharya Shri Sourabh J. Sarkar** — B.Tech, IIT Kharagpur, 1990; M.A. in Education and New Media, S.I. Newhouse School, Syracuse University — who left a corporate career to build it. Its subject has always been the same one: how a population changes a habit.

Kolkata Jaago — Safe Drive Save Life

Road-safety culture change across the city. Reached **300+ schools** and roughly **one lakh taxi drivers** in Kolkata.

This is the closest precedent to what the Krishi Ratna League has to do: take a behaviour everybody defends out of habit, and shift it — at the scale of a state, in Bengali, through the people who already have the trust.

Jeevan-Jeevika Abhiyaan — farmers, already

Mass behaviour-change campaigns for farmers in Odisha through the **SRI farming technique**; informal-sector workers in Rajasthan; vocational trainees in Maharashtra; health workers in Howrah; safai karmacharis in Mumbai.

The Odisha work matters most here. Persuading farmers to change a planting method they inherited is the same problem as KRL, solved once already.

OmniDEL — recognised, then funded NSDC Best Learning Methodology Award, 2014. A million-dollar grant from TATA Trusts, 2015.

Today OmniDEL is at the forefront of **Agentic AI for informal-sector transformation** — the capability the League's **Support & Verification** system is built on.

Growing things, at scale, on bad land

KarmYog Green Village, 2015 to date: roughly **12 acres** of HIDCO wasteland turned into a working eco-village — **2,000+ fruit-bearing trees**, pesticide-free vegetable production, training facilities.

50+ biophilic designs and **7+ Vatikas** built across Kolkata, Patna and Goa. Named a biophilic pioneer in India at ABID Expo 2024.

WHY THIS PAIRING IS THE POINT

A farmers' organisation with seven decades of institutional standing, and a movement with eighteen years of getting ordinary people to do something differently. Either one alone has tried this before and stalled. The reason to believe the Krishi Ratna League will run is that both halves of the problem have an owner.

The Krishi Ratna League

Take the format that made a nation watch cricket for two months a year, and point it at farming.

West Bengal's **294 assembly constituencies** are grouped into **15 regional teams** — a franchise here is a group of constituencies, not a cricket side. Every farm carries its own marks; a team's score is the aggregate of its farms. There is a table, and it moves.

How a farm is graded

Satya

সত্য

30%

TRUTH

Honest cultivation, and evidence of it. Dated, located records of what was actually done on the land — not what was claimed.

Mangal

মঙ্গল

25%

GOODNESS

Good for human health, for the soil, for the surrounding environment and its ecosystem — not only for the yield.

Sundar

সুন্দর

20%

BEAUTY · AGRO-TOURISM

A farm people would travel to see. Natural aesthetic, considered design, harmony with the land — the foundation of **agro-tourism**, and a second income the farm can build on.

Samriddhi

সমৃদ্ধি

25%

PROSPERITY · TECHNOLOGY

A true **Smart Integrated Farm** — tradition and modernity together, local and global together. **Technology** applied to real income.

THE QUALIFICATION GATE

A farm must be free of **harmful chemicals and harmful pesticides** to be scored at all. The emphasis is on **local and herbal solutions** — what the soil, the village and our own tradition already know how to make. A jury grades the farms; AI-assisted monitoring supports the farmer and keeps the record through the year.

Best individual farm — the most prosperous farm in Bengal

₹1,00,00,000

Best regional team — highest aggregate across its farms

₹1,00,00,000

Category awards — innovation and other categories

₹1,00,00,000

Total prize pool, Season 1

₹3,00,00,000

The team prize exists on purpose: a farmer in Purulia has a reason to help a farmer two constituencies away, because their marks are added together. The League is built to produce cooperation, not only winners.

The Smart Integrated Farm

Old Indian practice, mixed with modern technology, on land small enough that an ordinary family actually has it.

The central claim of the Krishi Ratna League is not that Bengal needs bigger farms. It is that a **prosperous** farm can run on **one to four bigha** if the design is right — integrated so that each element feeds another, free of harmful inputs, instrumented so the farmer can see what is working, and planned for income rather than subsistence.

Saying "I am farming" is not enough to be selected. The applicant has to design something. That is the filter, and it is deliberately a high one.

Munshi Bheri — the proof, built first

Before asking five thousand young people to do it, we are doing it once, in public, on the worst possible land.

Munshi Bheri, in the **East Kolkata Wetlands**, was a dump yard. Over roughly six weeks it is being turned into the first model Smart Integrated Farm — about **1.5 acres, four and a half to five bigha**. It is a learning farm: everything on it is meant to be copied.

And it is the Durga Puja ground. The **Durga Puja 2026 theme is Krishi Samaj — for the farmers**, and the pandal stands on the farm itself. Lakhs of people will walk through a working integrated farm during the Puja without having planned to learn anything. That is the awakening — *Jagaran* — and it is the reason the League launches at a Puja and not at a conference.

JAGARAN → JIJNASHA → ADHYAYAN → SADHANA

Awakening leads to a question. The question leads to study. Study becomes disciplined practice. It is the sequence the whole three-year journey is built on, and it is why the Puja ground had to be a real farm rather than a decorated one — a person who walks through and asks *how* has already taken the first step.

SAID PLAINLY

Some of the League's finer structure is still being settled — the exact number of farms per constituency, the final team map, the detailed marking rubric and the jury. Those are marked as not final wherever they appear, here and on the website, and they will be published when they are fixed rather than described before.

What supporting one farm means

One supporter. One agri-entrepreneur. One season. **₹1 Lakh — ₹1,00,000.**

Total support for one farm, one season	₹1,00,000
Paid as five monthly instalments of ₹20,000	5 × ₹20,000
To the farm — seed capital for the young entrepreneur	₹90,000 · 90%
Prize money — into the ₹3 crore Season 1 pool	₹6,000 · 6%
Support & verification, technology, coordination, training, mobilisation, events	₹2,000 · 2%
Administration	₹2,000 · 2%
Reaching the land	90%

Administration and everything around it comes to four per cent — among the lowest anywhere. We would rather print that than bury it. Ninety per cent goes into the ground; six per cent becomes the prizes that make this a contest worth entering.

How you choose your farm

Tell us your **bheete (ଭିତେ)** — not just the district. The **village, block, post office and police station** of your ancestral home. We will find applicants from as close to it as we can, send you **three** with their profiles and what each intends to build, and **you pick one**.

If your bheete has more supporters than applicants in a given round, we will say so and offer you the neighbouring blocks rather than quietly moving you.

What you receive, every month

- ◆ A named farm and the farmer's own profile
- ◆ Open logs — activity, photographs, expense ledger
- ◆ Progress against each of the five instalments
- ◆ The farmer's own video messages
- ◆ Invitation to the Season 1 awards, before Durga Puja 2027
- ◆ The farm may carry the name of your bheete, or of a parent

TAX

We are **80G registered**, so Indian taxpayers can claim the applicable deduction, and your receipt is issued against that registration.

What we promise, and what we do not

Everyone who has been asked for money from abroad, or from the next city, has the same two questions. Here they are answered before you ask them.

"How do I know the farm is real?"

Because you will watch it. Farm activity is logged with dated photographs and video. Expenses are recorded against that activity and published to a ledger you can open. AI processes the volume and flags what does not reconcile; human corrections stay visible rather than overwriting the record. Every rupee has a record, every record has a date, and the farm's own evidence sits next to its accounts.

The principle is one sentence: **what happens on the farm should be documentable and traceable.**

"And when the farm struggles?"

It will. Every farm does. There will be a hard month — weather, pest, a market that turns, a young farmer learning something the difficult way.

A struggle is not a failure. It is the part of the season where a Pravasi Bandhu becomes useful. The logs stay open precisely so that when a farm is in difficulty you can see it and **lend a hand in that battle** — a call, a contact, an introduction, an extra push at the right moment.

You are not a distant donor reading a report. You are one of the people in the fight. A supporter who is told only the good news has not been given transparency, only marketing — and this programme will be asking people for their trust for three years, which is far too long to be caught doing that.

HOLDING A FOREIGN PASSPORT OR AN OCI CARD? GOOD NEWS.

Our **FCRA documentation is being processed** — the registration that lets an Indian organisation receive contributions from overseas.

So if you hold a foreign passport or an OCI card, **raise your hand today**. Register your interest, tell us your bheete, and we will come to you with your three applicants as soon as FCRA is in place. Indian passport holders and residents in India can proceed immediately.

Raise your hand

Nothing is asked of you now except your interest and your bheete. No payment, no commitment.

1

You raise your hand

Your interest and your bheete — the village, block, post office and police station of your ancestral home. That is all.

2

We call you — twenty minutes

We walk you through the model farm at Munshi Bheri, open the logs in front of you, and answer whatever you want to press on.

3

Three applicants, and you choose

Real young women and men from as close to your bheete as we can find, with their profiles and what each intends to build.

4

The season begins at the Puja

Five monthly instalments of ₹20,000. Logs that stay open. An invitation to the awards before Durga Puja 2027 — where you may meet the person you backed.

Look us up before you give us anything
